Communicate Clearer

LIFE RELIES ON CLEAR COMMUNICATION

THE HARD FACTS ABOUT REVERSING

38 The highest number of fatal injuries to workers occur in the construction industry.

60+ There were 55 workers killed who are over 60 plus.

144 There were 144 workers killed in the workplace

100 There were 100 members of the public killed due to work related activities

“ Good gloves & excellent for seeing loaders banking in roads ”

Mr A.Easterby

Every great idea has a story.

We created Stop'N'Go with a health & safety manager of a municipal waste collector for one of their kerbside collection contracts.

It was something that had been bothering us all for quite a while....

How could we make reversing manoeuvres whilst out on collection rounds safer? What was the cause of misunderstanding, near-misses and accidents?

By collaborating with our contacts in the waste industry we found what we thought might be the answer, we were right!... We wanted to make signalling clearer so that the driver could clearly differentiate between the STOP and GO signals used throughout the industry.

We wanted to clear up communication.

How?

We experimented with a few different ideas.....one of them sewing lights into weatherproof jackets.....

Finally we landed on colouring the palm of the gloves used by reversing assistants RED and the back GREEN.

GO-X B PALM

Go-X Stop'N'Go Cut B Crinkle Latex Palm Coated Handling Glove

FEATURES & BENEFITS

The crinkle latex palm coating offers users excellent grip and durability and is perfect for outdoor tasks/roles. Designed with comfort and functionality in mind, wearers can use this glove in lower-risk environments for wet, dirty and heavy-duty handling.

APPLICATIONS

Low mechanical hazard handling with wet surfaces/objects. Offers improved grip with a crinkled finish to the palm.

SIZES

S = 7 | M = 8 | L = 9 | XL = 10 | 2XL = 11

40175

GO-X B FULL

Go-X Stop'N'Go Cut B Crinkle Latex Fully Coated Handling Glove

FEATURES & BENEFITS

Excellent durability and grip combined with comfort and waterproof protection make the GO-X B FULL perfect for handling tasks in the autumn and winter. Combining a comfortable liner with the crinkle latex coating it is the perfect option for wet and dirty handling tasks with a lower risk of cuts and injuries.

APPLICATIONS

Low mechanical hazard handling with wet surfaces/objects in wet conditions. Offers improved grip with a crinkled finish to the palm.

SIZES

S = 7 | M = 8 | L = 9 | XL = 10 | 2XL = 11

**40176****GO-X D PALM**

Go-X Stop'N'Go Cut D Crinkle Latex Palm
Coated Handling Glove

FEATURES & BENEFITS

The GO-X D PALM offers excellent protection and comfort for workers in high-risk environments. The crinkle latex coating offers a secure grip and is effective in repelling liquids and other contaminants in dirty handling tasks. The liner provides protection whilst being lightweight and comfortable to wear for long periods.

APPLICATIONS

High mechanical hazard handling with wet surfaces/objects. Offers improved grip with a gristled finish to the palm.

SIZES

XS = 6 | S = 7 | M = 8 | L = 9 | XL = 10 | 2XL = 11 | 3XL = 12

EN 388

**40177****GO-X D FULL**

Go-X Stop'N'Go Cut D Crinkle Latex Fully
Coated Handling Glove

FEATURES & BENEFITS

The ultimate cut protective glove to use in wet conditions. The full latex coating provides an excellent barrier from water ingress whilst the lightweight liner means that users do not have undue sweating, avoiding two of the main causes of contact dermatitis. The crinkle latex finish on the palm means that users have excellent grip no matter what the conditions.

APPLICATIONS

High mechanical hazard handling with wet surfaces/objects in wet conditions. Offers improved grip with a gristled finish to the palm.

SIZES

S = 7 | M = 8 | L = 9 | XL = 10 | 2XL = 11

EN 388

**40178****GO-XT D FULL**

Go-X Stop'N'Go Cut D Crinkle Latex Palm Coated Handling Glove

FEATURES & BENEFITS

Combining thermal protection and comfort with the best cut protection and durability, this glove is a brilliant choice for teams working outside in the winter months who need grip, cut protection and cost effectiveness. The crinkle latex finish ensures users have a decent grip and perform well over time. The liner is cut resistant meaning teams who experience sharp materials or surfaces can be assured they're protected and safe.

BS EN ISO 21420:2020
BS EN 388:2016+A1:2018 - 2X43D
EN 511:2006 - X21

APPLICATIONS

High mechanical hazard handling with wet surfaces/objects in wet and cold conditions. Offers improved grip with a gristled finish to the palm.

SIZES

M = 8 | L = 9 | XL = 10 | 2XL = 11

Winter Hand Protection with Stop'N'Go

Our customers work in a wide variety of conditions with different requirements for their workforce's comfort and ongoing productivity.

One common problem for a workforce that work outside (like waste collections, construction sites or civil engineering projects) is protection from cold and wet conditions.

That's why, our Go-XT D Fully Coated Crinkle Latex Thermal Glove is the perfect choice for the Winter months.

Designed to offer users cut resistance, water resistant comfort and protection from cold conditions. This is combined with durability, flexibility and superlative grip in wet conditions.

GO-N 1 PALM

Go-N1 Stop'N'Go Cut 1 Smooth Nitrile Palm Coated Handling Glove

FEATURES & BENEFITS

Lightweight and comfortable, this glove is the perfect handling option for low-risk tasks or warm weather. The breathable open liner is comfortable to wear at all times. A smooth nitrile coating offers durability and protection from liquids and oils.

APPLICATIONS

Low mechanical hazard handling with either wet or oily surfaces/objects

SIZES

S = 7 | M = 8 | L = 9 | XL = 10 | 2XL = 11

STANDARDS & RATINGS

THE HARD FACTS ABOUT REVERSING

1/4 Nearly a quarter of all deaths involving vehicles at work occur during reversing.

30% In the waste sector, 30% of all fatal injuries involve being struck by a moving vehicle.

50 Every year, about 50 people are killed due to workplace transportation.

100 There were 100 members of the public killed due to work related activities

GO-N D PALM

Go-N Stop'N'Go Cut D Smooth Nitrile Palm Coated Handling Glove

FEATURES & BENEFITS

The ultimate in high-performance durable cut protection. The liner for this glove offers lightweight comfort as well as cut protection. The coating is designed for the best durability and resistance and will perform over long periods of time. The smooth nitrile coating is applied to the palm to provide a breathable open back for greater comfort.

APPLICATIONS

High mechanical hazard handling with either wet or oily surfaces/objects

SIZES

S = 7 | M = 8 | L = 9 | XL = 10 | 2XL = 11

Why Red & Green

RED and GREEN are universally recognised as the two main colours for traffic control in our highways/road system both throughout this country and also the rest of the world. That means that it's very easy and intuitive for drivers to recognise RED as STOP and GREEN as GO.

There's also a scientific reason why they work so well in signalling. RED and GREEN have the longest wavelengths of all the colours visible to the human eye.

EN388 Explained

Our gloves provide their users with a great solution to clarify communication in your operations and on your sites. However, we know that our customers (you) need the gloves to do more than just this.

They need to provide protection against the various cut, abrasion and puncture risks present throughout the waste industry.

That's why we certify our whole range under the BSI EN388:2016+A1:2018 - Protective gloves against mechanical risks standard.

Reversing Signal Visibility

The below reversing signal visibility chart (details extrapolated from employee survey) demonstrates that a staggering 89% of employees confirmed that reversing visibility was noted to be better or superior to current gloves being used.

Managing Risk With Clear Lines of Communication

It is imperative that the person managing high risk activities of vehicles and mobile plant movement ensures that they are in a position of safety, are highly visible, and only use clear and agreed signals with drivers and operatives. The Stop'N'Go product range with its unique colour combination of Red (Stop) Green (Go) provides the driver / operator with clear signals and action to be taken.
